

# DropKick 21

## 4-0-21 with Boron

DropKick 21 is formulated to be applied during the reproductive growth stage or when the soluble and available nutrients represented on the label are needed. It can be used on a broad spectrum of field, fruit, vegetable, and forage crops, including Soybeans, Cotton, and Alfalfa.

**GENERAL INFORMATION:** Sugar Creek Ag suggests growers conduct soil tests and amend the soil accordingly. This product should be applied as a supplement to your overall fertility program. We suggest conducting a jar test prior to mixing with other ingredients to establish compatibility. If the solution is left in the spray tank overnight, agitate thoroughly before spraying. To avoid crop damage due to high temperatures, it is suggested to apply early morning or early evening. Product should not be stored where freezing is possible. Product may settle in storage and should be agitated before use.

**WARRANTY AND CONDITION OF SALE:** Manufacturer warrants that this material conforms to the chemical description on the label, and this product is reasonably fit for use as directed. No other warranty is made, either expressed or implied. Buyer acknowledges and assumes all risk and liability resulting from handling, storage, and use of this material. Manufacturer shall not be liable for claims resulting from use of this product not in accordance with the general information, application directions, and warnings on the label.

**WARNING: KEEP OUT OF REACH OF CHILDREN.** In case of contact with eyes, flush with water. Contact physician if irritation persists. Dispose of container in accordance with local, state, and federal regulations.

Net contents: 2.5 gallons  
Weight per gallon: 11.1 pounds

### GUARANTEED ANALYSIS:

Total Nitrogen (N) .....	4%
Soluble Potash ( $K_2O$ ) .....	21%
Boron (B) .....	0.5%

Derived from: Urea, Potassium Carbonate, Boric Acid

### DIRECTIONS FOR USE:

**SOYBEANS:** Apply 1 to 2 quarts per acre during the reproductive growth stage as needed to promote blooms and pod fill. Application can begin as early as first bloom and can be applied through pod fill.

**COTTON:** Apply 1 to 2 quarts per acre during the reproductive growth stage as needed, to promote boll development, maturity and fiber strength. Applications should begin at peak bloom and can be reapplied in 7- to 10-day intervals.

**WHEAT, BARLEY, OATS, RICE, AND SUGARCANE:** Apply 1 to 2 quarts per acre as needed.

**ALL OTHER CROPS INCLUDING ALFALFA, HAY, AND MORE:** To stimulate growth and improve plant vigor, apply 1 to 4 quarts per acre. Applications can be made at 7- to 10-day intervals, depending on the amount of growth desired.

**NOTES:** Apply with 10 to 20 gallons of water. Can be applied with other Sugar Creek Ag products and most herbicides, pesticides, and fungicides. Can be applied through drip or overhead irrigation.
