

LIQUID KELP

Ascophyllum Nodosum

LIQUID KELP is naturally derived from North Atlantic Kelp and is cold-processed for optimum performance. It can be applied to a variety of crops. LIQUID KELP can be applied alone or with other applications (starters and in-season foliar applications).

GENERAL INFORMATION: Sugar Creek Ag suggests growers conduct soil tests and amend the soil accordingly. This product should be applied as a supplement to your overall fertility program. We suggest conducting a jar test prior to mixing with other ingredients to establish compatibility. If the solution is left in the spray tank overnight, agitate thoroughly before spraying. To avoid crop damage due to high temperatures, it is suggested to apply early morning or early evening. Product should not be stored where freezing is possible. Product may settle in storage and should be agitated before use.

warrants that this material conforms to the chemical description on the label, and this product is reasonably fit for use as directed. No other warranty is made, either expressed or implied. Buyer acknowledges and assumes all risk and liability resulting from handling, storage, and use of this material. Manufacturer shall not be liable for claims resulting from use of this product not in accordance with the general information, application directions, and warnings on the label.

WARNING: KEEP OUT OF REACH OF CHILDREN. In case of contact with eyes, flush with water. Contact physician if irritation persists. Dispose of container in accordance with local, state, and federal regulations.

DIRECTIONS FOR USE:

ALFALFA, GRASS HAY, AND PASTURES: Apply 1 to 2 quarts per acre, at green-up and after each cutting. If grazing, apply every 30–45 days as needed.

CORN, SOYBEANS, AND COTTON: Apply 1 to 2 quarts per acre during any growth stage as needed. Can be added at planting, with starter.

HEMP, TOBACCO, AND COMMERCIAL PRODUCE: Apply 1 to 2 quarts per acre during any growth stage as needed. Can be added to setter water.

ALL OTHER CROPS: Apply 1 to 2 quarts per acre at any growth stage as needed.

NOTES: Apply with 10 to 20 gallons of water. Can be applied with other Sugar Creek Ag products and most herbicides, pesticides, and fungicides. Can be applied through drip or overhead irrigation.
